

Manufacturing Technician

Powerside is a leading end-to-end provider of Power Quality solutions. Based in Montreal, Canada, and in Alameda, California, the Company aims to fundamentally change the power quality market which, although it is large (\$40B annually and growing), is complex and confusing for many customers.

Our product range extends from the PQube™, the most capable and cost-effective power analyzer on the market, to a full range of low and medium voltage power correction equipment. To date, we have deployed 50,000+ monitoring solutions and delivered 5,000+ correction projects in over 50 countries. We are proud to count many of the worlds leading companies, including dozens from the Fortune 500, as our customers.

Powerside's focus is on Power Intelligence, a significant step above the traditional world of Power Quality. Customers today must identify and correct problems before they impact equipment and operations. Central to this mission is networked data which pinpoints power issues in real-time and allows operators to avoid downtime and to reduce energy consumption and operating costs.

We provide a competitive compensation package with healthcare and retirement plans. Also, all our employees share in the success of our company through a stock option plan.

About your new role

Among other duties, this position manufactures and assembles precision test and measurement equipment, calibrates and tests the products, assists with inventory. It is a physical job that requires lifting up to 50 pounds and assisting team members in lifting materials as well.

Responsibilities and Duties

Powerside is company is a global leader in the design and manufacture of easy-to-install, ultra-precise electric power instruments for monitoring power quality and energy and performing data analysis. We believe this role is critical to the success of the company, as you will be creating our product and establishing our name and reputation.

- Assembly of printed circuit boards into enclosures
