

PQube® 3 Rugged Wall-Mount Package

The Best Protection for Power Quality Monitoring Equipment!

Powerside's PQube 3 Rugged Wall-Mount Package is designed to protect monitoring equipment from weather and harsh industrial environments. An all-in-one unit that includes the PQube 3 Power Analyzer, which auto-detects the mains frequency, wiring configuration and nominal voltage. It is self-powered, connecting directly to voltages up to 690V. The PQube 3 Rugged Wall-Mount Package's quick connect terminal blocks make it fast and easy to install.

Benefits

- All equipment stored in one robust unit
- Quick connect makes installation fast and easy
- Ready-to-view event recordings and graphs
- No software to install

Connect it You're Configured

Once it's mounted and wired, the PQube 3 power analyzer auto-detects the nominal frequency, voltage, and wiring configuration saving time and money on commissioning.

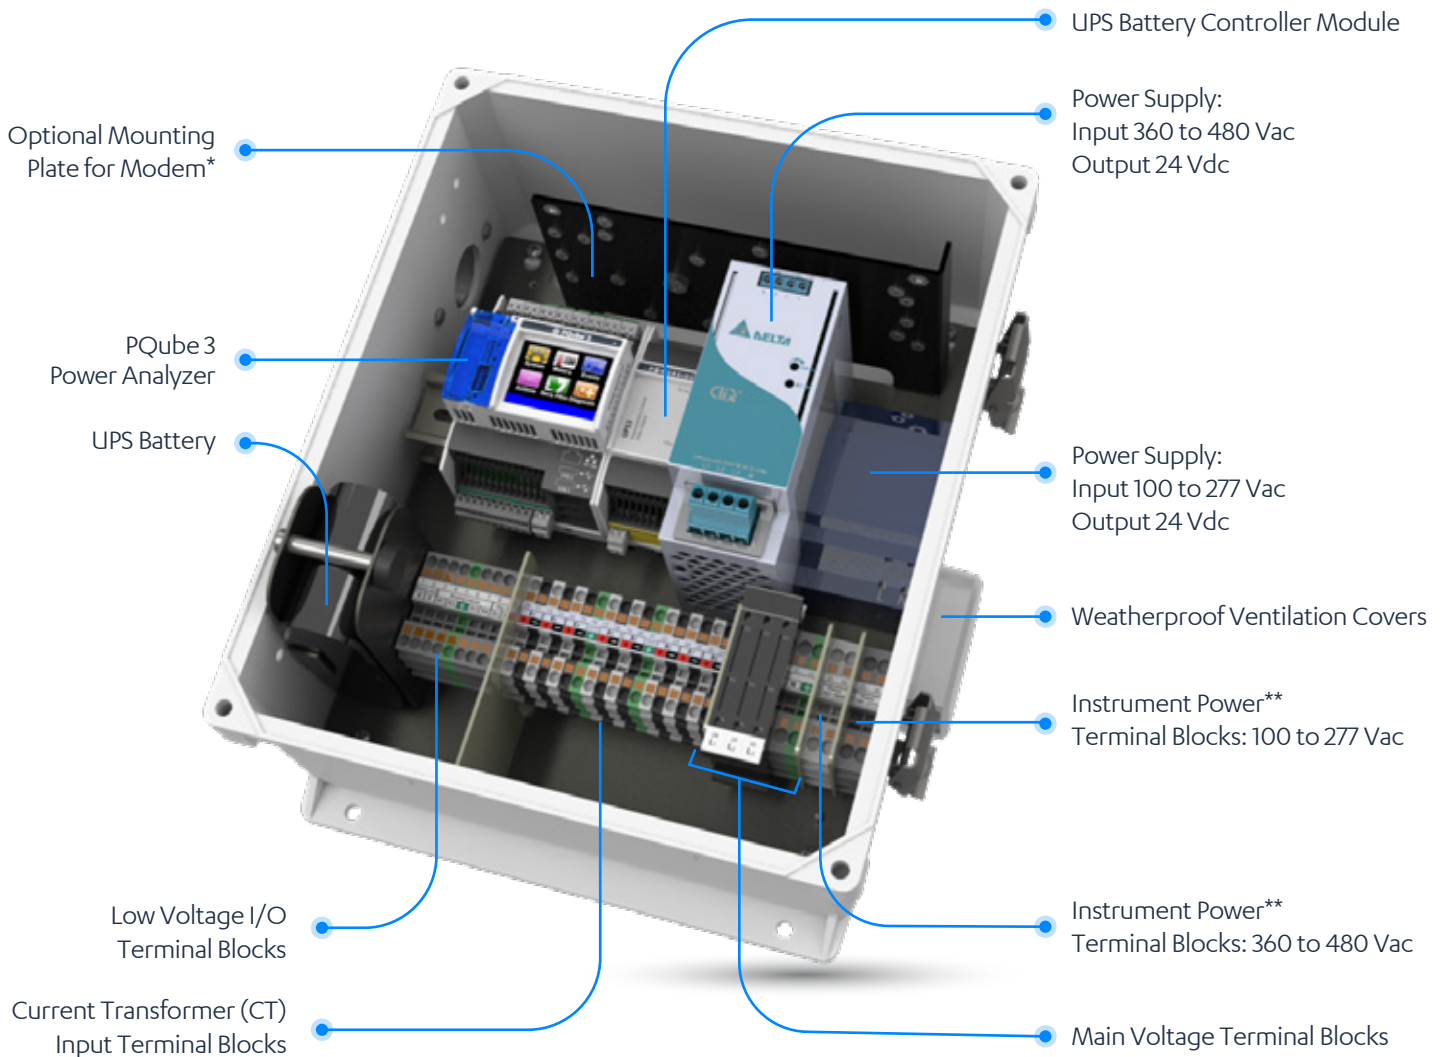

Features

- Built-in web server and email client
- Up to 1 hour UPS battery back up
- Hinged window for safe access to touch screen and display
- Support inputs for external sensors
- Simultaneous AC/DC voltage, current and energy readings
- IP44 rated enclosure

Rugged Wall-Mount Package

Product Overview
