

About Powerside

Powerside is a leading end-to-end provider of Power Quality and equipment monitoring solutions. The Company aims to change the \$40 B power quality market, which is too complex and confusing for many customers to navigate.

Our product range includes PQube®, the most capable and cost-effective power analyzer on the market, and a full range of low and medium voltage power correction equipment. To date, we have deployed 50,000+ monitoring solutions and delivered 5,000+ correction projects in over 50 countries. We are proud to count many of the world-leading companies, including dozens from the Fortune 500, as our customers.

Powerside's focus is on Power Security, a step above the traditional world of Power Quality. Harnessing IOT/cloud technology, and advanced analytics, Powerside's goal is to modernize the approach to system and facility monitoring in a broad range of high-value applications, ensuring that our Customers have reliable power, so they can focus on what they do best.

Powerside has facilities in Alameda, California, and Montreal, Quebec, Canada. We provide a competitive compensation package with healthcare and retirement plans.

All our employees share in the success of our company through a generous stock option plan.

Position: Full Stack Developer

Status: Permanent, Full Time – St-Laurent, Québec

Report to: Vice President Software Development

Role Overview
